Election/Restriction

1. An election without traverse of species (A) is acknowledged. Thus, claims 1-3 are being examined, and claims 4-17 are withdrawn from consideration.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buzak (US 4726663) in view of Kondo (US 5598285).

Buzak discloses a switchable color filter comprising (*see at least Figure 3, col. 5, line 19 to col. 7, line 34*): a transparent front plate (not shown, inherent element); a back plate (not shown, inherent element) spaced apart from the transparent front plate; a cholesteric liquid crystal (LC) material between the front plate and the back plate, the cholesteric liquid crystal material having a reflective state, wherein the cholesteric liquid crystal material in the reflective state reflects light characterized by a first wavelength in an absence of an applied electric field; means for applying an electric field to the cholesteric liquid crystal material in the reflective state to cause the cholesteric liquid crystal material to reflect light characterized by a second wavelength.

The limitation not disclosed by Buzak is 'means for applying an electric field parallel to the back plate'. The use of in-plane-switching (IPS) field LCD display device is common and

Art Unit: 2871

known in the art for advantages such as wide viewing angle. Kondo discloses an IPS-LCD device comprising a means of electric field applied parallel to the substrate for achieving advantages such as wide viewing angle. Therefore, it would have been at least obvious to one of ordinary skill in the art at the time the invention was made to employ a means for applying an electric field parallel to the back plate for achieving advantages such as wide viewing angle.

Per at least claims 2-3, see at least col. 5, line 19 to col. 7, line 34 of Buzak.

Response to Arguments

3. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2871

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
